Professional Summary

Software Engineer with expertise in developing secure full-stack enterprise solutions, specializing in access control systems and administrative dashboards that enhance efficiency and protect revenue streams.

Education

CMR Technical Campus Nov 2022 – Jun 2026
Bachelor of Technology, Computer Science and Engineering (Data Science) GPA: 8.58

Narayana Junior College *Jun 2020 – Mar 2022*
Intermediate (MPC) GPA: 9.69

Bapuji High School *GPA: 10* *Jun 2020*

Technical Skills

Programming Languages: C++, Java, Python, JavaScript, TypeScript.

Tools and Frameworks: React.js, Express, Node.js, HTML, CSS, Tailwind CSS, Git, Git Bash.

Database Management: PostgreSQL, MongoDB, Firebase.

Soft Skills: Communication, Collaboration, Problem solving, Attention to detail, Leadership, Ownership/Accountability.

Experience

Sofware Engineer Intern: Dattam Labs Dec 2025 – Jan 2026

- Engineered **Coba**, a Chrome extension that automates CAPTCHA resolution on e-court websites by integrating a custom-trained ML model served via **FastAPI** on **AWS Lambda**, streamlining legal document access workflows.
- Indexed complex legal PDFs into **Qdrant** vector database using **Vertex AI embeddings**, enabling efficient RAG-based semantic retrieval.

Software Engineer Intern: India In Pixels (iipmaps.com – a customizable map maker) **Proof** Nov 2024 – Feb 2025

- Engineered a **concurrent user access control system** preventing 25% potential revenue loss from account sharing across 1,000+ users, and implemented a user ban feature reducing policy violations by 30% and protecting 90% of users.
- Created a **collaborative organization dashboard** with project sharing and team management, resulting in 85% reduction in onboarding time and 2x improvement in project completion rates.
- Led development of an **enterprise admin panel & suite** with custom pricing, serverless email notifications, and automated inquiry tracking — cutting response time by 70%, handling 200+ monthly communications, and streamlining customer management by 40%.

DSA Mentor: Smart Interviews (An organization focused on teaching problem-solving and DSA) Sep 2024 – Jan 2025

- **Mentored 120+ students**, assisting juniors in debugging their code and providing guidance on solving complex problems.

Projects

ScriptFlow: Project Link Feb 2025 – Apr 2025

- Developed an **AI application** automating YouTube script generation via a Google Gemini **multi-agent system**.
- Engineered iterative AI agent refinement (classification, writing, validation) achieving >8/10 script quality scores.
- Built with **Next.js (React)**, **Node.js** , and **MongoDB** for **genre patterns** & user-generated scripts.

Map Tracker: Project Link Jan 2024 – Feb 2024

- Built a full-stack travel-tracking app using **Express.js**, **JWT**, **PostgreSQL**, and **bcrypt**, enabling users to log visited countries and visualize them on an interactive SVG map with dynamic color-coding.
- Implemented PostgreSQL **joins** between user and visited countries tables for efficient personalized map visualization

Certifications

- Complete Web Development Bootcamp (Udemy) Jun 2024 – Aug 2024
- Mentor (Smart Interviews) Sep 2024 – Jan 2025
- Smart Coder (Smart Interviews) Nov 2023 - Mar 2025

Achievements

- Won the inter-college quiz competition conducted by Intel Club among 30 teams, demonstrating strong problem-solving and critical thinking skills.
- Topped two internal coding contests conducted by Smart Interviews, demonstrating strong programming skills.
